- ❖ Environmental Voices Contact Information..... 6

MISSION STATEMENT

Our mission is to help preserve our future by providing education and research about toxic chemicals and how they affect our health and the environment.

ARTICLES & INFORMATION

Author Elana Freeland

- **ELANA FREELAND'S PRESENTATION ON GEOENGINEERING**

On November 2, 2018 Elana Freeland was an invited guest speaker at the H.E.A.L. meeting in Sun City - Roseville, CA. Below is the link to the full video of her presentation. The event was co-sponsored by Environmental Voices.

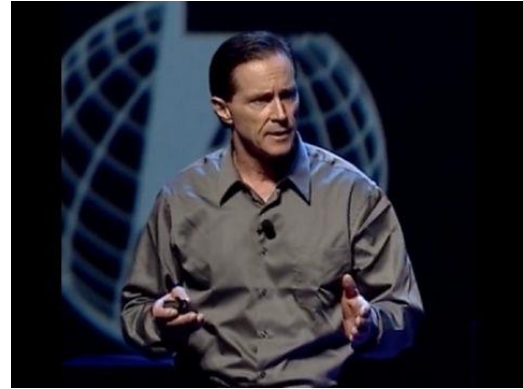

Elana is a writer, ghostwriter, lecturer, storyteller and teacher who researches and writes on Geoengineering and Deep State issues.

Her undergraduate degree was in creative writing with a second major in biology. Elana's Master of Arts degree from St. John's College, concentrated on historiography.

Be sure to check out her many books on Amazon.

Dane Wigington

- **DANE WIGINGTON'S (GEOENGINEERING WATCH) RADIO INTERVIEW**

Dane Wigington's latest radio broadcast on the fires in Northern California:

<https://www.youtube.com/watch?v=1tk5dliDT-w>

The true character of governments is becoming ever more visible as the walls begin to crumble on all sides. The climate engineering continues unabated and unacknowledged. Record drought and record wildfires on the West coast, record flooding and engineered winter in the US East. Will California get rain soon? Only the geoengineers know what will be scheduled. Even with the proverbial tidal wave of converging catastrophes looming over our collective heads, so many continue to double down on denial and apathy. How long can such behavior be maintained? We will soon enough find out. In the meantime, each and every one

of us are desperately needed to do our part in the critical battle to wake the masses. Sharing credible data from a credible source is essential, make your voice heard. Dane Wigington For more information go to the full Geoengineering Watch article:

This 30 second time-lapse video captures massive climate engineering operations spraying over California's smoke filled skies. It was filmed on November 14th from our mountaintop home in Shasta County. We are not only breathing highly toxic smoke, we are also inhaling untold amounts of highly toxic climate engineering fallout.

- **TESTIFYING IN SACRAMENTO FOR NUCLEAR DISARMAMENT**

Posted by Marylia Kelley and Rick Wayman

On August 14, 2018, two long standing California nuclear disarmament organizations were invited to speak at a legislative hearing held at the State Capitol in Sacramento.

Marylia Kelley, Executive Director of Tri-Valley CAREs, and Rick Wayman, Deputy Director of the Nuclear Age Peace Foundation, testified in support of Assembly Joint Resolution 33, a resolution in support of the Treaty on the Prohibition of Nuclear Weapons.

The resolution was introduced by Asm. Monique Limon, who represents Ventura and Santa Barbara Counties. The resolution, if passed by the Assembly and State Senate, "urges our federal leaders and our nation to embrace the Treaty on the Prohibition of Nuclear Weapons and make nuclear disarmament the centerpiece of our national security policy."

Millions of children and adults in schools around the world spend significant amounts of time around wireless devices and Wi-Fi. Many schools are introducing Bring Your Own Device (BYOD) policies and installing industrial wireless routers for tablets. However, wireless devices expose students and staff to microwave radiation that can impede learning and overall health. Studies have shown that microwave radiation can damage

reproductive systems, impact the immune system, alter brain functioning, and may increase cancer risk. Tablets have up to 5 antennae that are constantly emitting short intense bursts of radiation even when not connected to the Internet. Wireless devices in classrooms thus result in multiple sources of wireless radiation exposure. Solutions Exist

Schools are becoming increasingly aware that healthy and environmentally friendly facilities foster academic achievement and staff well-being. Low-EMF Best Practices allow for schools and safe technology to work together, using safe wired internet connections, thus reducing the overall impact on students and staff. Schools can incorporate Safe Tech Curriculum into health classes so that they can use their devices more safely at home, as well at school.

- **PARADISE FIRE (CAMP FIRE) BURNED TOXIC CHEMICALS**

"In California, Houses Burned. So Did the Toxic Chemicals They Contained."

By Sarah Maslin Nir, New York Times, 11/29/18

PARADISE, Calif. — The long, laborious process of returning Paradise and neighboring towns to a safe state will begin next month when crews in masks, Tyvek suits and booties begin combing through every last property in this town that was decimated by wildfire. Their targets are things like burned bottles of bleach, melted cans of paint, and corroded car batteries, which will be tagged and removed.

Environmental Voices' mission is to provide research and education. The information in the EV newsletter is not necessarily the opinions of EV or its staff.
