#### MISSION STATEMENT

*Our mission is to help preserve our future  
by providing education and research about  
toxic chemicals and how they affect our  
health and the environment.*

## EVENTS

- **OCTOBER 20, 2018**

### Geoengineering Watch Event

**Date:** October 20, 2018

**Time:** Doors Open at 5:00 p.m.

**Location:** Holiday Inn  
1900 Hilltop Drive  
Redding, CA  
(Free to the public)

For more information visit:

<https://www.geoengineeringwatch.org/geoengineering-watch-event-october-20th-2018/>

### Author Elana Freeland

- **NOVEMBER 3, 2018**

Elana Freeland is a writer, ghostwriter, lecturer, storyteller, and

teacher who researches and writes on Deep State issues, including MK-ULTRA, Geoengineering, and Invasive Electromagnetic Weapons. Her undergraduate degree was in creative writing with a second major in biology. Her Master of Arts degree from St. John's College specializes in historiography.

Elana will be speaking in West Sacramento. Below is the information about this free event.

**Guest Speakers:** Elana Freeland and Christopher Fontenot

**Date:** November 3, 2018 (Saturday)

**Time:** Elana Freeland 7:00-9:00 p.m.  
Christopher Fontenot 9:00-10:00 p.m.

**Location:** Arthur F. Turner Community Library Meeting Room

**Address:** 1212 Merkley Avenue  
West Sacramento, CA 95691  
916-375-6465

[westsaclibrary@yolocounty.gov](mailto:westsaclibrary@yolocounty.gov)

- **EV's MONDAY AND WEDNESDAY NIGHT CONFERENCE CALLS**

"Environmental Voices is hosting Monday and Wednesday Night Conference Calls the first week of each month.

On the first Monday of each month the calls will focus on 5G, WiFi, Cell Towers, etc. On the first Wednesday, we will be discussing various environmental and health issues like GMOs, 5G, Geoengineering, Vaccines and much more. This is an excellent networking opportunity for your organization to discuss critical health and environmental issues and educate others. Please join our conference call.

Time: 6:00 p.m. - 7:00-10:00 p.m. (PST)

Phone: 1 (515) 739-1015

Code: 678272192#

If you can't get through, please call me on my cell phone (916) 595-7197.

## **ARTICLES & INFORMATION**

- **IS 5G A COMMUNICATIONS OR A WEAPONS SYSTEM?**

They are rushing 5G into service without adequate safety tests. Mike Adams has a perspective that makes the introduction of 5G an even more frightening prospect.

- **FORMER DECORATED CIA OFFICER KEVIN SHIPP BLOWS THE WHISTLE**

Kevin Shipp was a decorated CIA officer who refused to look the other way in regard to government criminality and cover-up. At a very important public awareness event that was recently held in Northern California, Mr. Shipp gave an extremely informative and compelling presentation on numerous horrific ongoing government crimes. The subjects Kevin Shipp addressed included climate engineering, the 911 false flag inside job, vaccination dangers/cover-up, and the governments total persecution of anyone who dares to tell the truth about rampant government tyranny. The paradigm we have all known has been built on deception and the dark agendas of the global power structure. The courage Kevin Shipp has shown by doing his best to expose government criminality and tyranny serves as a stellar example to all of us. We desperately need other individuals in government agencies and the US military to follow Kevin's lead . If we have any chance of stopping the completely out of control criminal cabal that currently runs our country and much of the world, we must all make our voices heard, we must all join the battle for the greater good. Dane Wigington

• **ENVIRONMENTAL HEALTH TRUST**

• **Resources to Take Action on 5G Small Cell Streamlining Bills**

• 3157 is one of many federal streamlining bills fast tracking through the uS Congress that will pre-empt state and local government authority in regards to 5G small cells allowing 5G “small” cell antennas to be built in neighborhoods – in front yards on utility poles, street lights and buildings. It also will restrict rates that government can charge despite the fact that cell installations are shown to decrease property values of homes!

• **Environmental Health Trust Resources on 5G**

• Environmental Health Trust has compiled several key resources to ensure policy makers and governments have the scientific resources they need. Please take the time to review this list as well as the linked 5G organizations. .

• Over 200 scientists and physicians who have researched the biological and health effects of radiofrequency radiation have signed the [5G appeal](#), calling for a moratorium on the use of 5G technology.

• Please note that Petaluma California officials passed policy that will restrict these 5G small cells in front of homes. [Read about this here.](#)

• **TOP RESOURCES**

• [2o Quick Facts About 5G:](#) This webpage has a quick summary of what you need to know about 5G

small cells. We recommend that anyone interested in 5G start here to get an overview of the issues.

- \*To start- please see our [NEW Factsheet on 5G and Health](#). This factsheet is hyperlinked to scientific resources and key facts. [5G Factsheet in Color](#), [5G Factsheet in Black and White](#)

## • **5G - FROM BLANKETS TO BULLETS**

by Arthur Firstenberg

The single most important fact about 5G that nobody is talking about is called “phased array.” It will totally change the way cell towers and cell phones are constructed and will transform the

blanket of radiation which has enveloped our world for two decades into a million powerful beams whizzing by us at all times. Blake Levitt, author of *Electromagnetic Fields: A Consumer’s Guide to the Issues and How to Protect Ourselves* (Harcourt Brace, 1995), brought this to my attention. A mutual friend, with whom I was speaking during the campaign to defeat S.B. 649 in California, passed on a message from Blake: “5G antennas will be phased arrays; Arthur will know what that means.” And I did.

Phased arrays were one of the first things I learned about in the very beginning of my long, involuntary journey from medical student to campaigner against wireless technology. After I was injured by X-rays in 1980, I began to read everything I could get my hands on that had to do with electromagnetic radiation and its effects on life. And one of the first books I read was Paul Brodeur’s *The Zapping of America* (W.W. Norton, 1977).

### **Early warnings**

Brodeur was a staff writer for the *New Yorker* who had purchased property on Cape Cod, Massachusetts, only to discover that 30 miles inland, across the bay from his future home, the Air Force was planning to construct the world’s most powerful radar station. It was going to scan the Atlantic Ocean as a key early warning element protecting us against the threat of sea-launched ballistic missiles from the Soviet Union. Although it emitted an average power of only 145,000 watts, similar to some FM radio stations, it did not broadcast that energy from only a single antenna and it did not spread that energy out uniformly in all directions. Instead, it had 3,600 antennas

arranged in two “phased arrays” of 1,800 antennas each. The antennas in each array worked together as a unit to focus all their energy into a narrow, steerable beam. Each beam had an effective power of four billion watts, and the peak radiation level exceeded one milliwatt per square centimeter—the FCC’s safety limit today—at a distance of three miles in front of the radar station. The facility was called PAVE PAWS (Precision Acquisition of Vehicle Entry Phased Array Warning System).

The Defense Department acknowledged in a 1975 report, quoted by Brodeur, that such systems “energize thousands of operational elements, are electronically steered at high search rates, and operate at a frequency range having a maximum whole body energy transfer to man and for which little bioeffects data exists.”<sup>[1]</sup>

Shortly after I read this, I discovered firsthand what some of the bioeffects were. Attempting to finish my M.D. almost cost me my life. I collapsed one day with all the symptoms of a heart attack, whereupon I resigned from school and moved up to Mendocino to recover. There I was in the path of the other PAVE PAWS, the one that scanned the Pacific Ocean. This PAVE PAWS was due east of Mendocino, in California’s Central Valley at Beale Air Force Base. And for nine months, every evening at precisely 7:00 p.m., no matter where I was or what I was doing, my chest would tighten and I would be unable to catch my breath for the next two hours. At precisely 9:00 p.m., my body would relax and I could breathe. I lived in Mendocino from 1982 through 1984, and although I eventually recovered my health, I was always aware of an uncomfortable pressure in my chest

whenever I was on the coast. I also lived in Mendocino from 1999 to 2004, and felt that same discomfort whenever I was there, and always felt it suddenly vanish when I drove out of range of PAVE PAWS, and suddenly return at the same point on my journey home.

- **HEMET SUES DOW AND SHELL OIL OVER CONTAMINATED WATER**

By [Johnny Bender](#) | [jbender@scng.com](mailto:jbender@scng.com) | The Press-Enterprise

PUBLISHED: October 10, 2018 at 8:00 am | UPDATED: October 11, 2018 at 8:56 am

Hemet has filed a federal lawsuit against Dow Chemical and Shell Oil seeking reimbursement for the cost of removing a cancer-causing chemical from the city’s water wells.

According to its Sept. 21 suit, the contaminated wells have been tainted by TCP, a “highly toxic substance” used until the 1980s to fumigate soil where crops

were grown. The solvent's chemical name is "1,2,3-trichloropropane." Hemet Mayor Michael Perciful said low levels of the chemical were discovered in two wells during routine tests at least six months ago.

"We're all about keeping the public safe," Perciful said by phone. "The wells that have been tested have been shut off." To keep up with demand, Perciful said Hemet is getting replacement water from the Metropolitan Water District. He did not know how much money the city has spent cleaning the wells. "We're doing everything we can to keep the community safe, especially with water quality," he said.

Dow Chemical did not respond to a request for comment.

Shell Oil spokesman Ray Fisher said his company will vigorously fight the lawsuit.

"Shell's D-D Soil Fumigant was a highly beneficial product used by farmers more than 34 years ago to control microscopic worms that attacked crops, causing millions of dollars of crop loss each year," Fisher said in an email. "The product was approved for use by the U.S. government and the State of California."

According to a [2017 report on TCP contamination by the Environmental Working Group](#), a national advocacy group, the chemical was used in Dow's Telone and Shell's D-D pesticides from the 1950s into the 1980s.

- **DOCTORS WARN: AVOID GENETICALLY MODIFIED FOODS**

*By Jeffrey M. Smith*

On May 19<sup>th</sup>, the American Academy of Environmental Medicine (AAEM) called on "Physicians to educate their patients, the medical community, and the public to avoid GM (genetically modified) foods when possible and provide educational materials concerning GM foods and health risks." They called for a moratorium on GM foods, long-term independent studies, and labeling. AAEM's position paper stated, "Several animal studies indicate serious health risks associated with GM food," including infertility, immune problems, accelerated aging, insulin regulation, and changes in major organs and the gastrointestinal system. They conclude, "There is more than a casual association between GM foods and

adverse health effects. There is causation,” as defined by recognized scientific criteria. “The strength of association and consistency between GM foods and disease is confirmed in several animal studies.”
